# MODE OF OPERATION:

## Sanitizing Tunnel With MS & ACP.

## CONTACT US

- Installation in entry of busy public spaces like markets, government buildings, Colleges etc
- Tank will be filled with Solution
- Sensors will be switched on.
- Public can then enter the tunnel where disinfectant solution would be sprayed 5-50 Seconds, which can be adjustable
- Spraying to be continuous throughout the day
- Solution is efficient enough to kill the virus on body/ clothes
- System Don't need to be switched of Only during cleaning and maintenance you can switch off this.
- Our Nozzles are Ultra fine , which helps To generate Fogging and Vapour.which can be used to disinfect the whole body easily.
